WORK EXPERIENCE

Power Platform Developer | SAS Water Ltd | Stoke-On-Trent, UK | October 2024 – December 2024
- Worked on PowerApps to build applications, automate workflows, and visualise data. Enabling the delivery of efficient solutions that effectively improved SAS Water operations

Analyst | EApps Global | London, UK | February 2024 – December 2024
- Analysed complex datasets to uncover actionable insights, enabling strategic, data-driven decisions that optimised processes and achieved organisational goals

Full Stack Developer | Code Institute | Dublin, UK | June 2024 – November 2024
- Developed web applications using JavaScript, Python, Django, PostgreSQL, HTML, CSS, Bootstrap, and similar technologies. These projects expertised me about full stack development, managing databases, and designing for multiple screens

Business Analyst | [Reddy Retail Ltd](#) | Cambridge, UK | May 2022 – January 2024
- Oversaw regular performance tracking, process management, organisational functionalities, driving organisation growth, manage stock, and ensure excellent customer satisfaction through KPIs

Analyst | [RYS Retail Ltd](#) | Waterbeach, UK | October 2021 – April 2022
- Led efforts to streamline processes, reducing checkout wait times by 19%, demonstrating a focus on operational efficiency, which aligns with managing and improving configuration management processes. Worked closely with team members to ensure smooth operations, much like coordinating management role, using tools like Confluence and Jira to foster collaboration and track tasks
- Resolved customer issues efficiently, showcasing problem-solving skills that would be beneficial in addressing configuration and data management issues, utilising M365 for organisation workflows
